www.gamajet.com

*Bob Delaney has been the chairman and owner of Gamajet since purchasing the company in 1993.*

*Delaney graduated from Villanova University, Philadelphia, PA, in 1963, with a bachelor's degree in economics, and a master's degree in mechanical engineering in 1972.*

### Company History

Founded in 1955 in Exton, PA, Gamajet designs and manufactures tank cleaning machines and equipment to clean and remove residues from the interior of tanks and vessels utilizing its patented impingement cleaning method.

Gamajet tank cleaning machines are used worldwide to clean the interiors of virtually any size or type of tank, bin, or vessel in all types of industries such as beverage, brewing, chemicals, and petroleum.

### Biofuels Beginning

We became involved with the biofuels industry in 2004-05 after receiving many phone calls from ethanol plants asking how to clean their process tanks.

Because of our many years of supplying cleaning machines to other industries, it was a natural progression for us to get into ethanol.

For example, we have worked with many ethanol plants to install our rotary impingement cleaning technology to improve the operational efficiency of their fermentation and yeast tanks.

### Tank Cleaning Equipment

We offer over 15 different models of Gamajet machines handling tank diameters from 5 feet to 200 feet, and tank heights from 5 feet to 100 feet.

All of our tank cleaning machines are field serviceable, rugged, durable, and versatile. We also provide service capabilities and technical support.

Our entire product line can be repaired in the field or by our factory service technicians.

Our new Gamajet X, AlphaFP and AlphaJET FP products are designed specifically to clean biofuels process or storage tanks.

Each product provides the specific tank cleaning capability required to support the effective deployment of biofuels.

With biofuels, contamination can be found anywhere in the tank, so the entire tank surface needs to be cleaned.

Our products enable this and do it in an efficient manner saving time, labor, and reducing waste.

### The Future of Gamajet

New fuel formulations are going to continue to create challenges, and existing infrastructure will need to be prepared to handle these new fuels.

We are getting calls from all over the world from fuel distributors and service companies looking for help in accommodating these biofuels, and we are looking forward to working with them.

## THINK BOILER RENTALS!

✓ 20,000 to 150,000 lb./hr.

✓ Operating pressures from 100 to 750 PSI

✓ State-of-the-art low-NO<sub>x</sub> burner

✓ Detachable skid-mounted boiler

✓ In-house Field Service Crews & Technicians

## THINK VICTORY ENERGY!

### Plan with the best and be prepared for anything.

In an industry where timing is everything, being prepared is crucial. Victory Energy supplies cost-effective mobile boiler rental units for virtually any utility, institutional and industrial steam application.

✓ Optional water treatment systems are available

Optional mobile water treatment systems include deaerators, water softeners, boiler feedwater pumps and a chemical treatment system.

Our fleet of trailer-mounted boilers and water treatment systems range in size from 20,000 lb./hr. to 150,000 lb./hr. and operating pressure from 100-750 psi. These units are configured to be dispatched directly to a job site, quickly and safely.

✓ Large inventory of parts

For more information or immediate needs, call:

**1.877.STEAMOK.**

✓ Total boiler-tech support - 24/7

✓ We design and manufacture what we rent

Response No. 1211
