

Tank and Fuel Cleaning Now Comes in Two Sizes!

AlphaJET

MegaJET

Gamajet is continuously finding ways to make your tank cleaning challenges easier. Today's diesel and biofuels are susceptible to contamination and sediment. Tanks, above or below ground, can now be cleaned, easily and affordably. Our portable systems ensure your tanks are minimally out of service. Gamajet's extremely popular **AlphaJet** cleans tanks up to 1250 gallons, and our new **MegaJet** cleans large size diesel tanks. Both fluid driven units, designed to fit all standard UST inlets, utilize a 360° rotary impingement cleaning technology to power away problem causing dirt and fuel-fouling contaminants. To learn more, call today, or visit us on the web at Gamajet.com.

Clean Fuel Starts with a Clean Tank!

- Prepare tanks for alternate fuels, or product changeover
- Portable gas or electric driven systems
- Cleans and polishes tanks from totes to 20,000 gallon tanks, above or below ground, Gamajet has a system
- Ideal for any type of fuel oil storage; home heating, farm, backup generator, boats, fleet lot or portable fueling tanks
- 360 degree impingement cleaning technology scours all interior surfaces of the vessel

See how Gamajet has helped dozens of industries with their cleaning needs by viewing our online videos at www.gamajet.com! Never put clean fuel back into a dirty tank!

GAMAJET®

Keeping tanks and fuel clean!

Why Clean the Tanks?

Fuel storage tanks with low turn-over are susceptible to water condensation and microbial contamination. Home heating oil customers buy fuel in the Spring when it is on sale and don't use it until Fall. Farmers top off tanks at end of planting or harvest. Backup generator customers' fuel can sit for up to two years. All depend on this stored fuel when it is needed most. Today's new fuels are less stable and breakdown over time, allowing contaminants to live everywhere inside storage tanks. You need to clean the entire tank.

Save and Make Money

Clean an entire tank in just a few hours from setup to cleanup. Our patented technology powerfully cleans an entire tank interior yet is able to fit into a standard opening. Powered by industry respected pumps, the Alphajet and the Megajet rids tanks of existing contamination and remedies issues caused by new fuel formulation. Gamajet provides the benefit of doing so without the inconvenience of spending days with the tanks out of service.

Portable and Quick

With gas-driven or electric motors, and fuel ready pumps and filters, these systems can be used in virtually any location. If electric power is available, simply plug into a standard 115v outlet for the Alphajet. After inserting the unit into the tank and hooking up your suction hoses, the Alphajet or Megajet system can start polishing and cleaning in minutes.

TYPICAL APPLICATIONS

	AlphaJet	MegaJet
Hydraulic Fluid Reservoirs, Drums, Totes	<input type="checkbox"/>	<input type="checkbox"/>
ASTs up to 1250 Gallons	<input type="checkbox"/>	<input type="checkbox"/>
Marine Tanks	<input type="checkbox"/>	<input type="checkbox"/>
USTs and ASTs Greater than 1250 Gallons	<input type="checkbox"/>	<input type="checkbox"/>
Tanker Trailers	<input type="checkbox"/>	<input type="checkbox"/>
ISO Tanks	<input type="checkbox"/>	<input type="checkbox"/>
